POINT OF USE WATER SYSTEM

Water - Drink 8 a Day

Health care professionals recommend that the average person drink 8 - eight ounce servings of water every day. Unfortunately, over 2,100 contaminants have been identified as potential threats to the drinking water supply. A point-of-use water treatment system is ideal for consumers concerned about their local water quality, or who are simply looking to have better tasting water.

A Fresh Approach and New Look

The innowave WL100 brings value and a new look, to point-of-use. Unlike bottled water coolers, incoming tap water is filtered as it's needed, so the water is always fresh and great tasting. The innowave WL100 has a cooling capacity that surpasses that of the ordinary bottled water cooler, so you are sure to get a cold, refreshing glass of water every time. The WL100 nozzle features anti-bacterial protection with BioCote®.

Filtration Technology Enhances Drinking Water

The Innowave WL100 uses 2-stage multi-filtration to treat drinking water. First, a 1-micron Carbon Block filter reduces contaminants as small as 1-micron. Next, a 10-micron Granular Activated Carbon filter polishes taste. Both filters have been tested and certified by WQA according to NSF/ANSI-42 for the reduction of Taste & Odor, and chlorine reduction.

The innowave WL100 is available in a hot/cold version in both freestanding and counter top options.

Innowave WL100 Specifications

Freestanding

Width: 13.5 in. (35 cm)
Depth: 16.0 in. (41 cm)
Height: 40.5 in. (103 cm)

Water Connection: 1/4" tubing
Power Supply: 120V/60Hz
Amps: 7.6 Amps (Hot/Cold)
All figures are approximate and subject to change

Counter top

Width: 13.5 in. (35 cm)
Depth: 16.0 in. (41 cm)
Height: 17.5 in. (45 cm)

The innowave WL100 has been tested and certified to UL Standard 399 and CSA C22.2 No. 120-M91

POINT OF USE WATER SYSTEM

No Bottle Hassles

- :: Automatically refills for a virtually endless supply
- :: No bottles to lift, store or replace
- :: System maintained by your innowave® Dealer
- :: No deliveries enhances building security

Increase Security by Reducing Deliveries

Many companies today are focusing on building security. By decreasing the number of unauthorized personnel on your premises, you are contributing to the safety and well-being of all associates. Additionally, you're not blocking entries with delivery trucks, nor using up valuable space by storing water bottles!

A Versatile System

- :: Provides cold and hot water

High Performance Filter

- :: Improves water taste

Anti-Microbial Protection

- :: BioCote® protected plastics

Environmentally Friendly

- :: Carbon filter is bio-degradable

Recyclable And Reusable

- :: Plastic housing is designed for re-use

Cost Reduction For Customers

- :: Replacement filter cartridges offer savings

Individually Bagged

- :: Packaged and sealed for protection/hygiene

New Filter System

Our new WQA Certified High Performance, Environmental Filter System features removable filter cartridges, which are bio-degradable and can be removed from the housing, which can be cleaned and re-used, thanks to the BioCote® anti-bacterial protection. Plastic components can be separated and recycled. The carbon material is not only environmentally friendly, but it is also completely biodegradable.

The new high performance filters remove cysts, chlorine, as well as bad taste and odors as certified by the WQA for NSF/ANSI-42. This filter system is also compatible with most Point-of-Use (POU) water coolers.
