

# Chiller SPORT™

The Highest Standards...  
The **SAFEST** Drinking Water

## THE LATEST IN BOTTLE-LESS TECHNOLOGY

### Water - Drink 8 a Day

Health care professionals recommend that the average person drink at least 8 - eight ounce servings of water every day. Unfortunately, over 2,100 contaminants have been identified as potential threats to the drinking water supply. They fall into four groups: Organic, Inorganic, Biological and Radioactive. A point-of-use water treatment system is ideal for consumers concerned about their local water quality, or who are simply looking to have better tasting water.

### Filtration Technology Enhances Drinking Water

The innwave Chiller Sport™ uses 3-stage filtration to treat drinking water. First, a 5-micron Sediment filter traps sediment and solid particle matter. Then, a 1-micron Carbon Block filter reduces contaminants as small as 1-micron. Next, a Granular Activated Carbon filter reduces chlorine and polishes taste.

### Tested and Certified Treatment Technology

The innwave Chiller Sport™ uses three different filters to treat the drinking water. First, a 5-micron, Sediment Filter traps sediment and solid particle matter. Then, a Carbon Block Filter traps contaminants as small as one micron. The 1-micron filter used in the innwave Chiller Sport™ has been tested and certified by WQA according to NSF/ANSI Standard 53: Drinking Water Treatment Units - Health Effects for the reduction of at least 90% of lead and 99.99% of cysts. The 1-micron and Granular Activated Carbon filters have also been tested and certified to NSF/ANSI Standard 42: Aesthetic Effects for the improvement of taste and odor and aesthetic chlorine reduction. The innwave Chiller Sport™ has been tested and certified by WQA according to NSF/ANSI Standard 61: Drinking Water System Components - Health Effects.

### ITS™ Controls Bacteria

**The innwave Chiller Sport™ is also equipped with ITS™ (In-Tank Sanitization).** This feature utilizes ultraviolet light as an effective method to prevent the potential for biofilm (slime) buildup in the storage tank after chlorine has been reduced through carbon filtration. Ultraviolet technology also helps reduce any heterotrophic bacteria that may occur in drinking water. This reduces the need for preventative maintenance and improves drinking water quality.

### innwave Chiller Sport™ Specifications

Width: 15.0 in. (38 cm)  
Depth: 14.0 in. (36 cm)  
Height: 46.0 in. (117 cm)  
Water Connection: 1/4" tubing

Weight: 68.3 lbs. (dry)  
Power Supply: 120V/60Hz  
Amps: 8.3 Amps (Hot/Cold) 1.8 Amps (Cold)  
All figures are approximate and subject to change

The innwave Chiller Sport™ has been tested and complies with UL Standard 399

### The innwave Chiller Sport™ Treatment Process

- 1 Sediment Filtration (12-2000)**
  - Reduces particles as small as five microns (.0002 in.)
  - Reduces sediment
  - Adds to the life of the carbon filter
- 2 Micron Filtration (12-2001)**
  - Traps contaminants as small as one micron (.00004 in.)
  - Reduces chlorine and organic contaminants
- 3 Filtration (12-2002) (granular activated carbon)**
  - Improves taste and odor
  - Reduces chlorine
- 4 Ultraviolet Light**
  - Reduces heterotrophic bacteria
  - Valuable alternative to chlorine

# Chiller SPORT™

The Highest Standards...  
The **SAFEST** Drinking Water

## THE LATEST IN BOTTLE-LESS TECHNOLOGY

### Say Goodbye to Bottles

The innwave Chiller Sport™ is not a bottled water system. There are no heavy bottles to lift, store or replace. This eliminates the need for outside deliveries and enhances building security. Ordinary tap water is treated at the point-of use, eliminating the risk of recontamination that could be caused by additional pipes or plumbing. The innwave Chiller Sport™ provides a continuous supply of great-tasting water dispensed at hot or cold temperatures.

### No Bottle Hassles

- :: Automatically refills for a virtually endless supply
- :: No bottles to lift, store or replace
- :: System maintained by your innwave® Dealer
- :: No deliveries enhances building security

### The Highest Standards

innwave's goal is to provide water treatment systems that meet the highest standards and provide the safest drinking water. By utilizing a combination of modern water treatment technologies, innwave® water treatment systems consistently provide high quality drinking water.

### High Standards for Service

- :: Filters replaced routinely by qualified innwave® service technicians
- :: Preventative maintenance performed

### A Versatile System

- :: Provides cold and hot water
- :: Conveniently accommodates large sport mugs and bottles up to **9.5" tall**.

### Increase Security by Reducing Deliveries

Many companies today are focusing on building security. By decreasing the number of unauthorized personnel on your premises, you are contributing to the safety and well-being of all associates. Additionally, you're not blocking entries with delivery trucks, nor using up valuable space by storing water bottles!

### Independent Testing

- :: 1-micron filter tested and certified by WQA according to NSF/ANSI Standard 53: Drinking Water Treatment Units – Health Effects for the reduction of lead and cysts
- :: 1-micron and Granular Activated Carbon filters have been tested and certified to NSF/ANSI Standard 42: Aesthetic Effects for the reduction of chlorine and improvement of taste and odor
- :: Tested to UL Standard 399 to meet safety requirements

Also available in a mini for space saving convenience.
